

HIV: The Impact on Women

Satellite Conference

Wednesday, September 17, 2003

2:00-4:00 p.m., Central Time

As of the year 2002, women make up 50% of HIV infected individuals world-wide. This program will provide valuable information to clinicians concerning women who have HIV infection, managing contraception in pregnancy, and the presentation of techniques to identify HIV in our female client population.
